WILDER STREAM — Executive Summary

The Decentralized Content Engine for Wilder World

Date: March 15, 2026 **Author:** Frank Wilder, CEO — Wilder World **Status:** DRAFT — Pending Team Sign-Off

---

1. VISION

Wilder World builds a self-sustaining content flywheel where **players create the source content, clippers distribute it globally, and $WILD token powers the entire economy.** Zero internal content production cost. Infinite output.

The system has two sides:

	WILDER STREAM	WILDER CLIPS
Who	Players who stream/record WW gameplay	Editors who clip & distribute short-form content
What they do	Upload high-quality gameplay footage	Turn raw footage into viral TikTok/Reels/Shorts
How they earn	$WILD based on Stream Quality Score	$WILD based on views their clips generate
Our cost	$WILD tokens	$WILD tokens
Our benefit	Infinite raw content library	Infinite organic reach across all platforms

The flywheel: More streamers → more raw content → more clippers → more distribution → more players discover WW → more streamers.

---

2. WILDER STREAM — The Source Engine

2.1 What It Is

A proprietary web app (**stream.wilderworld.com**) where Wilder World players upload their gameplay recordings and livestream VODs. Think of it as Wilder World's own content depot — a library of high-quality gameplay footage that feeds the entire marketing machine.

2.2 Who It's For

- Players who already stream WW on Twitch, YouTube, Kick
- Players who record gameplay but don't have a streaming audience
- Content creators looking for a new revenue stream
- Anyone playing WW who wants to earn while they play

2.3 The Upload Flow

```
Player records/streams WW gameplay
        ↓
Uploads to Wilder Stream (drag & drop, or connect Twitch/YT for auto-import)
        ↓
System auto-analyzes: resolution, duration, gameplay quality, kill count
        ↓
Stream Quality Score (SQS) calculated
        ↓
$WILD payout based on SQS
        ↓
Footage enters the Content Library (available for clippers)
```

2.4 Stream Quality Score (SQS)

The payout formula incentivizes exactly the content we want: **long, high-resolution, action-packed gameplay.**

```
SQS = Base Rate × Resolution Multiplier × Duration Multiplier × Action Density × Concurrent Viewers Bonus
```

Resolution Multiplier

Resolution	Multiplier	Why
1080p	1.0×	Minimum accepted
1440p (2K)	1.5×	Our preferred sweet spot
2160p (4K)	2.5×	Premium — best for cropping to 9:16
4K + HDR	3.0×	Top tier — future-proofed content

Duration Multiplier

Duration	Multiplier	Why
10–30 min	1.0×	Short session
30–60 min	1.3×	Standard stream
1–2 hrs	1.6×	Solid session, more clip-worthy moments
2–4 hrs	2.0×	Marathon — maximum content value
4+ hrs	2.0× (cap)	Diminishing returns after 4hrs

Action Density Score

AI-analyzed metric based on:

- **Kill count** per hour of footage
- **Kill streaks** (multi-kills, sprees)
- **Combat engagement rate** (% of time in active combat vs. idle/walking)
- **Cinematic moments** (vehicle sequences, aerial views, explosions, boss fights)

Action Density	Multiplier
Low (mostly idle/exploring)	0.5×
Medium (regular gameplay)	1.0×
High (frequent kills, constant action)	1.5×
Highlight Reel (non-stop combat, streaks)	2.0×

Concurrent Viewers Bonus (For Livestreamers)

If the player was livestreaming while recording, their average concurrent viewers during the session provide a bonus. This rewards streamers who are already distributing WW content to an audience — and the bigger their audience, the more organic reach WW gets for free.

Avg. Concurrent Viewers	Bonus
0 (recorded, not streamed)	1.0× (no bonus)

1–50	1.2×
50–500	1.5×
500–5,000	2.5×
5,000+	4.0×

Payout Calibration

Target: USD-pegged rates that beat organic Twitch earnings.

Market context for a 1K CCV streamer, 1-hour stream:

- Organic Twitch earnings: ~$25–50/hr (ads + bits + subs)
- Sponsored stream rate: ~$1,000–1,500/hr (brand deal)
- **Wilder Stream target: $50–100/hr equivalent in $WILD** (doubles organic income without hitting sponsor rates)

```
Base Rate = $5 USD equivalent in $WILD per 1.0 SQS
(Adjusted monthly based on $WILD spot price)
```

At current $WILD ≈ $0.022, Base Rate = ~227 WILD per 1.0 SQS.

Example Payouts

Scenario	SQS Calc	SQS	$WILD	USD Equiv.
Casual player, 1080p, 20min, low action, no stream	1.0 × 1.0 × 0.5 × 1.0	0.5	~114	~$2.50
Decent session, 2K, 1hr, medium action, no stream	1.5 × 1.3 × 1.0 × 1.0	1.95	~443	~$9.75
Good session, 4K, 1hr, high action, 200 CCV	2.5 × 1.3 × 1.5 × 1.5	7.31	~1,659	~$36.50
Strong streamer, 4K, 2hrs, high action, 1K CCV	2.5 × 2.0 × 1.5 × 2.5	18.75	~4,256	~$93.63
Top streamer, 4K HDR, 3hrs, highlight reel, 3K CCV	3.0 × 2.0 × 2.0 × 2.5	30.0	~6,810	~$149.82
Elite streamer, 4K HDR, 4hrs, highlight reel, 10K CCV	3.0 × 2.0 × 2.0 × 4.0	48.0	~10,896	~$239.71

Sanity check — 1K CCV streamer, 1hr, 4K, high action:

- Earns ~$94 from Wilder Stream upload
- Plus organic Twitch revenue (~$25-50/hr) they're already earning
- Total: ~$120-145/hr — compelling enough to stream WW over other games
- Plus 5% royalty on downstream clips (could add $20-100+ if clips go viral)

All USD equivalents auto-adjust monthly. If $WILD rises to $0.10, fewer tokens distributed for same USD value. If $WILD drops, more tokens. Treasury exposure is managed, not open-ended.

2.5 Content Guidelines

To be accepted into Wilder Stream, footage must:

- ✅ Be authentic Wilder World gameplay (AI-verified)
- ✅ Minimum 1080p resolution, 30fps
- ✅ Minimum 10 minutes duration
- ✅ No watermarks from other platforms
- ✅ No hate speech, slurs, or offensive overlays
- ❌ Re-uploads of other players' content = permanent ban
- ❌ AI-generated or synthetic gameplay = rejected

2.6 Streamer Tiers

Consistent uploaders unlock higher base rates and perks:

Tier	Requirement	Perk
Rookie	First upload	Standard rates
Regular	10+ uploads, 20+ hrs total	+10% base rate
Veteran	50+ uploads, 100+ hrs, avg SQS > 3.0	+25% base rate, early access to new maps
Elite	200+ uploads, top 10 monthly SQS	+50% base rate, featured streamer badge, WW merch
Partner	By invitation	Custom rate, co-marketing, official WW streamer title

---

3. WILDER CLIPS — The Distribution Engine

3.1 What It Is

A Vyro-style clipping marketplace (**clips.wilderworld.com**) where editors browse the Wilder Stream content library, create short-form clips, distribute them on social platforms, and earn $WILD based on views.

3.2 Who It's For

- Short-form video editors and clippers
- TikTok/Reels/Shorts creators looking for gaming content
- Fans who want to make WW highlight reels
- Professional gaming content editors

3.3 The Clipping Flow

```
Clipper browses Wilder Stream Content Library
        ↓
Downloads raw footage from approved streams
        ↓
Edits into short-form clip (15s–3min, vertical 9:16)
        ↓
Posts on TikTok, Instagram Reels, YouTube Shorts (their own accounts)
        ↓
Submits clip URL to Wilder Clips for tracking
        ↓
Views tracked across all platforms
        ↓
$WILD payout based on total views
```

3.4 View-Based Payout Structure

Benchmarked against market rate ($3 CPM on Vyro, $0.50–2.00 CPM on TikTok Creator Fund):

View Milestone	Rate	Cumulative Example
0 – 1,000 views	1 WILD per 100 views	1K views = 10 WILD
1,000 – 10,000	2 WILD per 100 views	10K views = 190 WILD
10,000 – 100,000	5 WILD per 100 views	100K views = 4,690 WILD

100,000 – 1,000,000	10 WILD per 100 views	1M views = 94,690 WILD

Clip Multipliers

Multiplier	Bonus	Criteria
🎯 Kill Clip	1.5×	Clip features eliminations
🖥️ 2K+ Source	1.3×	Clipped from 2K or higher footage
🔥 Trending Audio	1.2×	Uses trending sound/music
⭐ Official Feature	3×	WW reposts on official channels
🏆 Weekly Winner	2×	Top-performing clip of the week

3.5 Quality Control

- **Auto-check:** Format, resolution, duration, WW branding present
- **AI Review:** Confirms real WW gameplay, not stolen/re-uploaded
- **Community Flagging:** Other clippers can report stolen content
- **Strike System:** 3 strikes (stolen content, fake views, spam) = permanent ban

3.6 Attribution Chain

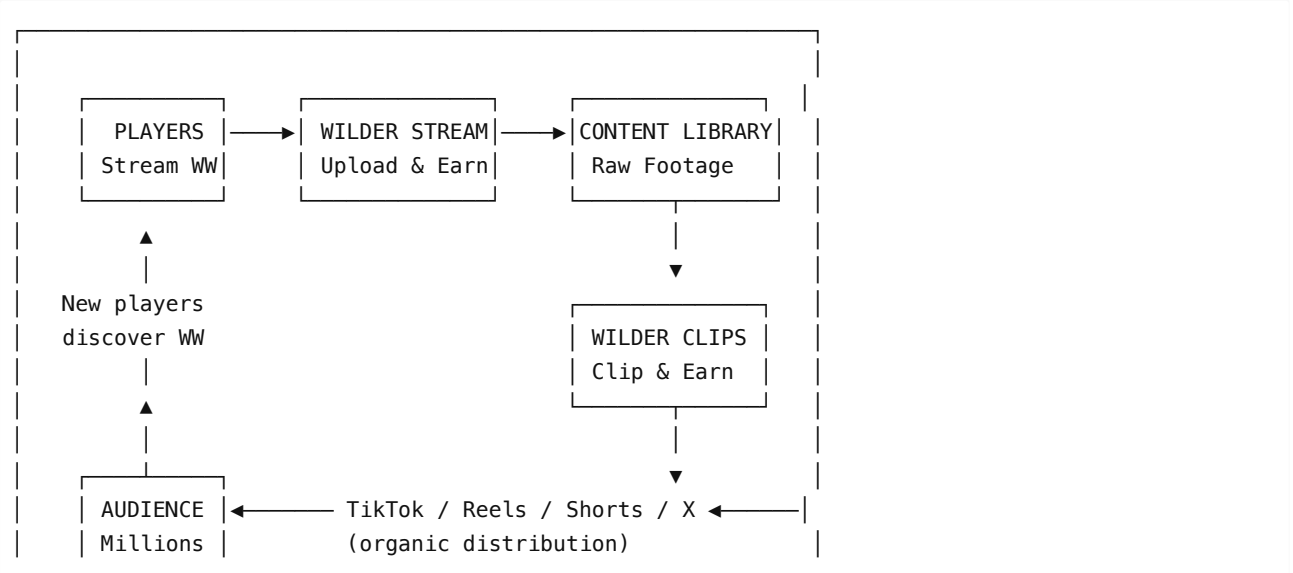
Every clip tracks back to the original streamer:

```
Streamer uploads 2hr 4K session → earns 95 WILD (SQS payout)
        ↓
Clipper A makes a kill montage → 50K views → earns 1,890 WILD
Clipper B makes a cinematic edit → 200K views → earns 14,690 WILD
Clipper C makes a meme clip → 5K views → earns 90 WILD
        ↓
Original streamer earns 5% royalty on all clips from their footage
= additional 833 WILD from downstream clips
```

The streamer royalty (5% of clipper earnings) is critical — it incentivizes streamers to upload the highest quality footage possible, because better footage = more clippers use it = more royalties.

---

4. THE FULL FLYWHEEL



```
│    └──────────┘                                          │
│                                                          │
│    $WILD flows: WW Treasury → Streamers → Content Library   │
│                 WW Treasury → Clippers → Distribution       │
│                 Streamers earn royalties from clippers       │
│                                                          │
└──────────────────────────────────────────────────────────┘
```

4.1 Flywheel Economics

Input: $WILD tokens from treasury **Output:** Organic reach, new players, content library, brand awareness

Metric	Month 1	Month 3	Month 6	Month 12
Active Streamers	25	100	500	2,000
Hours Uploaded/Week	100	800	4,000	16,000
Active Clippers	50	300	1,500	5,000
Clips Published/Week	200	2,000	15,000	50,000
Weekly Views (all clips)	500K	5M	50M	200M
Weekly $WILD Distributed	10,000	80,000	500,000	1,500,000
Effective CPM (in USD)	~$5	~$3	~$2	~$1.50
New Players from Content	200	3,000	30,000	150,000

Effective CPM decreases as scale increases — content becomes the cheapest user acquisition channel at scale.

4.2 Why This Beats Traditional Marketing

	Traditional	Wilder Stream + Clips
Content production	Internal team films, edits	Players create it by playing
Distribution	Paid ads, organic posts	Hundreds of clippers post everywhere
Cost model	Fixed + CPM on ads	Variable, pay only for results
Authenticity	Brand-produced, feels corporate	Real players, real gameplay, real reactions
Scale ceiling	Limited by team bandwidth	Unlimited — more players = more content
Player acquisition cost	$5–15 per install (paid UA)	<$2 at scale via organic content

---

5. ADDITIONAL REVENUE MECHANICS

5.1 Brand Campaigns (Revenue Stream)

Once the content library and clipper network reach scale, **external brands can post campaigns:**

- Energy drink brands, gaming peripheral companies, crypto projects
- They pay $WILD (or USD converted to $WILD) to run a clipping campaign
- Clippers create branded content featuring WW gameplay + sponsor
- **This turns WCN from a cost center into a revenue generator**

5.2 Premium Content Marketplace

Top-tier footage (4K, cinematic, professionally edited) can be:

- Licensed to media outlets, gaming publications
- Used in WW official trailers (streamer earns bonus)
- Sold as stock gameplay footage to other creators

5.3 The Labyrinth Integration

Clip earnings funnel through the Wilder economy:

- $WILD earned can be spent on Wilder Packs
- Wilder Pack purchases feed The Labyrinth (buy/burn mechanism)
- **Content creators become economic participants, not just marketers**

---

6. COMPETITIVE LANDSCAPE

Platform	What They Do	What They Don't Do
Vyro	Clipping marketplace, $3 CPM, MrBeast-backed	No source content creation, no gaming focus, no token economy
Medal.tv	Auto-clip gaming highlights, 2M clips/day	No creator payouts, no distribution incentive
Eklipse	AI auto-clips from streams	Tool only, no marketplace, no payouts
Pearpop	Performance-based UGC challenges	Brand-focused, not gaming, no content library
Allstar.gg	Cloud-based gaming clip generation	CS2/LoL only, no payout model
Wilder Stream + Clips	**Full stack: source creation + content library + clipping marketplace + token-powered payouts + game-native**	**Nobody else has this**

---

7. TECHNICAL ARCHITECTURE (HIGH LEVEL)

Phase 1 — MVP (Weeks 1–4)

Wilder Stream:

- Web app: upload portal with drag & drop
- Auto-detection: resolution, duration, codec
- SQS calculator (resolution × duration × action density)
- $WILD balance tracking (database, not on-chain yet)
- Content library browser for clippers

Wilder Clips:

- Campaign/brief posting system
- Clip URL submission + view tracking (TikTok/IG/YT APIs)
- View-based $WILD payout calculator
- Creator profiles + leaderboard

Shared:

- Wallet connect (MetaMask / WalletConnect)
- Creator dashboard (earnings, analytics, history)
- Admin review panel (approve/reject/flag)

Phase 2 — Scale (Weeks 5–12)

- Twitch/YouTube auto-import (connect account, auto-pull VODs)
- AI action density scoring (kill detection, combat analysis)
- Streamer royalty system (5% of downstream clip earnings)
- On-chain $WILD payouts (smart contract)
- Anti-fraud: view verification, duplicate detection, bot filtering
- Mobile app (upload from phone)

Phase 3 — Ecosystem (Months 4–6)

- External brand campaign portal
- Premium content licensing marketplace
- Auto-clipping AI (suggest clip-worthy moments from uploads)
- Streamer OBS plugin (one-click upload after stream ends)
- Labyrinth integration ($WILD → Wilder Packs flow)

---

8. GO-TO-MARKET

Launch Sequence

Week 1–2: Closed Alpha

- Invite 10–20 known WW streamers
- Seed the content library with 100+ hours of footage
- Onboard 20–30 clippers from the WW Discord community
- Test SQS formula and payout calibration

Week 3–4: Open Beta

- Open Wilder Stream to all players
- Launch first clipping campaign on WCN + cross-post to Vyro
- Announce $WILD reward pool: "100,000 $WILD up for grabs in launch month"
- Partner with 3–5 mid-tier gaming streamers (1K–10K concurrent) for paid launch streams

Month 2: Public Launch

- Full marketing push: "Get Paid to Play Wilder World"
- TikTok campaign showing real earnings (streamer makes X, clipper makes Y)
- Reddit/Discord/X community activation
- Weekly "Top Clipper" and "Top Streamer" spotlights on WW socials

Month 3+: Scale

- Referral program: streamers invite other streamers, earn 5% of their SQS payouts
- Seasonal campaigns: "Summer of Wiami" clip contest, holiday events
- External brand partnerships begin
- Target: 500 active streamers, 1,500 active clippers

---

9. RISKS & MITIGATIONS

Risk	Impact	Mitigation
Low initial content quality	Poor clips reflect badly on WW brand	Minimum quality gates, SQS threshold for library inclusion
View botting / fraud	Wasted $WILD, unfair payouts	Anti-fraud layer: IP analysis, engagement patterns, platform API verification

$WILD price volatility	Creator earnings fluctuate	Peg payout rates to USD equivalent, adjust $WILD amounts quarterly
Platform API changes	TikTok/IG restrict view tracking	Multi-platform tracking, screenshot verification fallback
Content theft	Clippers steal from outside WW	AI fingerprinting of all library content, DMCA process
Low streamer adoption	Insufficient source content	Guaranteed minimum payouts for first 100 streamers, seed with internal footage

---

10. SUCCESS METRICS

KPI	30-Day Target	90-Day Target	6-Month Target
Active Streamers	50	200	1,000
Weekly Hours Uploaded	200	2,000	10,000
Active Clippers	100	500	3,000
Weekly Clips Published	500	5,000	25,000
Total Weekly Views	1M	20M	100M
New Players Attributed to Content	500	5,000	50,000
Content-Driven DAU Increase	+200	+2,000	+10,000
Effective CPA (Cost Per Acquisition)	$8	$4	<$2
$WILD Distributed Weekly	25,000	150,000	500,000

---

11. BUDGET & TOKEN ALLOCATION

Proposed Budget — Year 1 (USD-Pegged)

All payouts pegged to USD value, distributed in $WILD at monthly spot price.

Category	Monthly USD	Annual USD	Monthly $WILD (@ $0.022)	Notes
Streamer Payouts (SQS)	$15,000	$180,000	~682,000	Scales with uploads
Clipper Payouts (Views)	$20,000	$240,000	~909,000	Scales with distribution
Streamer Royalties (5%)	$1,750	$21,000	~79,500	Auto-calculated
Launch Incentives	$10,000	$10,000	~454,000	One-time launch pool
Weekly Contests/Bonuses	$5,000	$60,000	~227,000	Top clipper/streamer rewards
Total	**~$51,750/mo**	**~$511,000/yr**	**~2,350,000/mo**	

At scale (Month 12 projections):

Category	Monthly USD	Monthly $WILD (@ $0.022)
Streamer Payouts	$80,000	~3,636,000
Clipper Payouts	$120,000	~5,454,000
Streamer Royalties	$10,000	~454,000
Contests/Bonuses	$15,000	~682,000
Total at Scale	**~$225,000/mo**	**~10,227,000/mo**

If $WILD appreciates (e.g., to $0.10), the same USD budget distributes ~78% fewer tokens. USD-pegging protects both sides: creators get predictable income, treasury manages token dilution.

---

12. TEAM REQUIREMENTS

Role	Responsibility	Timing
Product Lead	Own Wilder Stream + Clips product roadmap	Immediate
Full-Stack Dev (×2)	Build web apps, APIs, dashboard	Immediate
AI/ML Engineer	Action density scoring, gameplay verification, anti-fraud	Phase 2
Community Manager	Onboard streamers, manage clipper community	Launch
Content QA (×2)	Review uploads, moderate clips	Launch
Smart Contract Dev	On-chain $WILD payout system	Phase 2

Note: Jean Clawd (AI) handles: initial app build, content pipeline automation, analytics dashboard, trend monitoring, and clipper campaign management.

---

13. DECISION REQUIRED

For Team Sign-Off:

- ☐ **Approve the two-sided model** (Wilder Stream + Wilder Clips)
- ☐ **Approve SQS formula** and payout calibration
- ☐ **Approve $WILD token allocation** (~6.9M WILD Year 1)
- ☐ **Approve MVP scope** (4-week build, closed alpha first)
- ☐ **Approve launch timeline** (Alpha Week 1–2, Beta Week 3–4, Public Month 2)
- ☐ **Assign Product Lead** and dev resources
- ☐ **Confirm Vyro integration** for cross-platform clipping distribution

---

"Every player becomes a content creator. Every content creator becomes a marketer. Every marketer earns $WILD. The game markets itself."

— Wilder World, 2026
